

BES Clinical Seating Seminars – Scotland 2025

Next-Generation Wheelchair Ergonomics

Join us for a unique training event showcasing recent developments in wheelchair and seating ergonomics. Featuring the Effortless Postural Control (EPiC) seating system from Stealth Products and the Dynamic Arm Support (DAS) upper limb positioning system from Bodypoint, this event will explore innovative solutions to complex clinical challenges.

The program will include two **clinical case studies**, presented by the inventor:

1. Overcoming Limitations in Seating Ergonomics

This case study focuses on the ergonomic challenges of seating, including the limitations of conventional systems to address postural variation and functional needs. Drawing on a 15-year ergonomic study, this case demonstrates the development of a novel postural management system. Designed to support both high and low tone seating challenges, this innovative system provides dynamic postural variation and functional support.

2. Addressing Upper Extremity Positioning Challenges

This case study examines the prevalence of shoulder subluxation and upper extremity contractures amongst individuals with neurological conditions. It highlights the clinical need for innovative upper extremity support to prevent subluxation and hand contractures while enabling functional movement. These unmet needs inspired in-depth research into the pathophysiology of these conditions, culminating in the development of a prototype designed to address these challenges effectively.

1st – 4th April 2025

- ✔ **Expert-Led Workshops:**
Participate in interactive training led by Physiotherapist, Bart Van Der Heyden - Gain hands-on experience and insights into innovative assessment and prescription techniques in seating and positioning.
- ✔ **Product Demonstrations:**
Experience the latest innovations in seating and wheeled mobility, designed to enhance patient outcomes and streamline your rehabilitation practices.
- ✔ **Networking Opportunities:**
Connect with like-minded professionals, exchange ideas, and build valuable relationships within the rehabilitation community.

Bart Van Der Heyden is a world-renowned Physiotherapist, based in Belgium, with over 20 years experience in specialist clinical seating, mobility and wound care.

Shaping Improved Outcomes in Seating and Mobility

This training event is open to clinicians, dealers, distributors and anyone with an interest in clinical seating. We look forward to welcoming you to this opportunity to explore the future of wheelchair and seating ergonomics and discover practical solutions to enhance clinical outcomes.

Dates and Locations*

Tuesday, 1st April – Edinburgh

Wednesday, 2nd April – Dundee

Thursday, 3rd April – Aberdeen

Friday, 4th April – Glasgow

*10am-3pm, venue details tba
